## DETAILED ACTION

### *Specification*

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### *Claim Objections*

2. Claim 8 is objected to because of the following informalities: The number "146" in line 3 of the claim should be removed. Appropriate correction is required.

### *Drawings*

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "electrode pad portion" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 2879

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Allowable Subject Matter***

4. Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding independent claims 1 and 5, the prior art of record neither shows nor suggest a rear plate for a plasma display comprised of, in part, electrodes having a specific resistance of  $2.5 \times 10^{-4} - 4 \times 10^{-4}$  Ohms cm; a dielectric layer with a dielectric constant of 8-20, a reflectance of 50-80%, an etch rate of 0.03-0.8 microns/min with respect to an inorganic acid, and a thickness of 10-30 microns; barrier ribs having a dielectric constant of 7-18, a reflectance of 40% -70%, an etching rate of 1.0-30.0 microns/minute with respect to an inorganic acid, and a thickness of 100-160 microns; and a phosphor layer having a thickness of 10-30 microns, along with the rest of the limitations of the claim(s).

Due to their dependency, claims 2-4 and 6-8 are necessarily allowable

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

5. This application is in condition for allowance except for the following formal matters:

Please see the above action.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
